BACKGROUND OF THE INVENTION

Field of the Invention

[0002] The present invention relates to a head drum assembly, and more particularly to a head drum assembly mounting structure on a deck of a tape recorder.

Description of the Background Art

15 [0003] Generally, a tape recorder such as a camcorder, VCR, or the like has a fast rotating head
16 drum assembly mounted on a main base of a deck. The head drum assembly includes a magnetic
17 head which scans a traveling magnetic tape for information recording/reproducing.
